INERTIA User Manual

INERTIA Equities For Wealth

Operator guide — navigation, screens, and daily workflows

INERTIA — User Manual

Application: INERTIA Equities For Wealth

Audience: New advisors, ops staff, and managers

Last updated: May 2026

This manual explains how to sign in, navigate every major screen, and complete day-to-day work in the investment management system. It reflects the current top navigation in `templates/base.html`. Some menu items appear only when your role or environment enables them (see Optional features).

1. What this system does

INERTIA is an investment advisory operations platform. In one place you can:

Area · What you do here

Clients · Maintain client records, portfolios, agreements, and billing

Investments · Run monthly investment cycles, recommendations, and trade execution

Transactions · Record and upload trades, cashflows, and corporate actions

Reviews · Generate period analysis, performance emails, and client reviews

Workflows · Track monthly investments and other processes through defined stages

Ops · Tasks, alerts, data-integrity checks, and intelligence dashboards

CRM · Leads, meetings, tickets, invoices (when enabled)

Compliance · Audit trails, agreements, SEBI-oriented record keeping

Currency in the UI is typically **Indian Rupees (■)**. Large amounts may display in Lakhs/Crores on some screens.

2. Getting started

2.1 Sign in

In-app manual: After login, use **Assistant** in the top navigation bar — **Ask INERTIA** for chat help or **User manual (PDF)**. On mobile, open **More** → **Assistant**. Admins also see **SQL assistant** under the same menu.

1. Open the URL provided by your administrator (e.g. `https://your-company-domain/`).
2. Enter your **email** and **password**.
3. Complete **two-factor authentication (2FA)** if prompted (mandatory for most users).
4. You land on the **Dashboard** (`/dashboard`).

Tips

- Use **Remember me** only on trusted personal devices.
- If your session expires, you will be redirected to login; refresh and sign in again.
- After failed login attempts, contact your administrator if the account is locked.

2.2 Set up 2FA

1. Click your **username** (top right) → **2FA Security**.
2. Follow the on-screen steps to scan the QR code with an authenticator app.
3. Store backup codes safely if the system offers them.

2.3 Browser and device

Requirement · Detail

Browser · Chrome, Firefox, Safari, or Edge (current version)

JavaScript · Must be enabled

Screen · Desktop: 1024×768 minimum; phone: use mobile layout or Capacitor app

Internet · Stable connection for uploads and live prices

2.4 Flash messages

Green, yellow, or red banners at the top of the page confirm success, warnings, or errors after an action. Read them before navigating away.

3. User roles and access

What you see depends on your role. The system **fails closed**: if you lack permission, a menu item is hidden or the page returns forbidden.

Role · Typical access

Advisor · Assigned clients only; recommendations; workflows for those clients; attendance

Manager · Broader client visibility; practice analytics; client–advisor assignments; most ops tools

Ops manager · Maintenance menus, ops tasks, uploads, trade data (with advisor/manager)

Admin · User management, database tools, cron/logs, full system settings

Client assignment: Advisors usually see only clients where they are the assigned advisor (`advisor_id` or assignment rules). Managers and admins see more.

Maintenance menu: Visible when you are a **manager**, **advisor**, or **ops manager** (`can_manage_ops`).

4. Navigation overview

4.1 Top navigation (desktop)

Click the **INERTIA logo** anytime to return to the Dashboard.

Menu · Purpose

Clients · Client list, ops tasks, analytics, leads, agreements, tickets, invoices

Communication · Meetings, WhatsApp dashboard and templates

Maintenance · Hub pages for uploads, trades, reference data, recommendations, reviews, modelling

Dashboards · Monthly investments, all workflows, review schedules

Hub · Intelligence dashboards (operational, investment, system, business)

Attendance · Personal attendance; admins also manage team attendance and claims

Admin · Users, roles, database browser, SQL, system settings

User (username) · Profile, 2FA, logout

4.2 How dropdowns work

- Hover or click the menu name to open items.
- The **active** page is highlighted in green in the nav bar.
- Dividers group related items (e.g. analytics vs leads).

4.3 Finding a feature quickly

I want to… · Go to…

Open a client · **Clients** → **All Clients** → click name

Upload trades · **Maintenance** → **Data upload** → **Trade upload**

See monthly investment stage · **Dashboards** → **Monthly investments**

Create recommendations · **Maintenance** → **Recommendations** → **Generate** or client detail → Recs

Log a meeting · **Communication** → **New meeting**

Fix an SLA alert · **Dashboard** alert cards → **Alerts** list

Change my password · **User menu** → **Profile**

5. Mobile and PWA

On phones (or the Capacitor app), a **bottom bar** replaces part of the top nav:

Tab · Goes to

Home · Dashboard

Clients · All clients

Dashboards · Monthly investments / workflow hub

Recs · Unified recommendations

More · Offcanvas menu: maintenance, tasks, hub, settings, profile, logout

Client detail on mobile: Summary cards (health, portfolio value) and **quick actions** (Recs, Workflow, Review). Scroll down or tap **All tabs** for the full desktop sections.

Install as app: Use the browser “Add to Home Screen” / PWA install prompt where available.

6. Home — Dashboard

Path: `/dashboard`

Nav: Logo or **Home** (mobile)

What you see

Summary **cards** (clickable) typically include:

Card · Meaning · Typical action

Total clients · Count you can access · Opens client list

Total AUA · Assets under advice · Informational

Equity AUA · Equity portion of AUA · Informational

Pending invoices · Draft + sent invoice value · Billing follow-up

Pending / delayed reviews · Review workload · Period analysis or review tools

Practice analytics · Manager-only practice view · Full analytics dashboard

System alerts · SLA and process alerts · Alert list filtered by severity

Lead follow-ups · Leads needing contact · Leads list

Open / critical tickets · Service tickets · Tickets module (if enabled)

Lower sections may show **recent tickets**, **workflow alerts**, and quick links to alert management.

Daily routine (suggested)

1. Open Dashboard and scan **critical alerts** and **delayed reviews**.
2. Open **Ops tasks** (if enabled) for items assigned to you.
3. Drill into **monthly investments** for clients stuck in a workflow stage.
4. Use **Clients** search for any client you need to action today.

7. Clients and CRM

Menu: Clients (dropdown)

7.1 All Clients

Path: `/clients-v2` (list; detail often `/clients/<id>`)

Action · How

Search · Type in search box; results filter as you type (desktop)

Filter by health · Excellent / Good / Warning / Critical

Active only · Checkbox to hide inactive clients

Risk profile · Conservative / Moderate / Aggressive

Add client · **Add New Client** button → `/client/add`

Open client · Click row or card

Inactive clients: Use **Mark inactive** on client detail; toggle **Active only** off on the list to see them.

7.2 Ops Tasks

Path: `/tasks` (when `NAV_TASKS_ENABLED`)

Task list with counts: active, due today, overdue, pending.

Action · Steps

View task · Click task row

Create task · **New Task** (if you have manage permission)

Complete / update · Open task → update status and notes

Tasks may be created automatically from **data integrity issues** or **review workflows** via assignment rules.

7.3 Client Analytics

Path: Financial analytics dashboard (when enabled)

Portfolio-level analytics across clients (not the same as single-client detail).

7.4 Practice Analytics

Path: `/practice-analytics`

Who: Managers or users with explicit route access.

Practice-wide metrics: client counts, AUA distribution, operational KPIs. Use **Download** where offered for exports.

7.5 Leads

Screen	Path	Purpose
All Leads	`/leads`	Pipeline list
Add Lead	`/leads/new`	New prospect

From a lead you can progress **workflows** (lead module) and convert to client when ready.

7.6 Agreement templates

Path: Agreement templates list (ops users)

Manage Word/PDF templates used for client agreements. Upload templates via maintenance upload hub when applicable.

7.7 PaRRVA submit

Path: PaRRVA submission page (when `NAV_PARRVA_ENABLED`)

Regulatory submission workflow for eligible users.

7.8 Service tickets

Path: `/tickets` (when enabled)

Action	Steps
List tickets	**Clients** → **Service Tickets**
New ticket	**Clients** → **New Service Ticket**
Filter	Open / critical / by client from dashboard links

7.9 Invoices

Path: `/invoices` (when `NAV_INVOICES_ENABLED`)

Create and track client invoices; links from client billing sections.

7.10 Financial planning

Path: Financial planning dashboard (when `FINANCIAL_PLANNING_ENABLED=true`)

External module integration; menu appears under **Clients** only when turned on in deployment.

8. Communication

Menu: Communication

8.1 Meetings

Screen · Purpose

Meetings · List past and upcoming client meetings

New meeting · Schedule or log a meeting with client link, notes, and date

Use meetings for review discussions, onboarding, and documented client contact (SEBI audit trail).

8.2 WhatsApp

Screen · Purpose

WhatsApp dashboard · Overview of messaging integration

WhatsApp templates · Manage message templates

Meta Groups API setup · Technical setup for group messaging (if shown)

Send client communications through approved templates; avoid ad-hoc advice outside logged channels where policy requires documentation.

9. Maintenance (ops users)

Menu: Maintenance — visible to managers, advisors, and ops managers.

Maintenance is organized as **hub pages** with large buttons linking to detailed screens. Use the hub that matches your task, then the specific tool.

9.1 Data upload

Path: `/maintenance/data-upload` (hub: `main.data_upload_links`)

Tool · Use for

Trade upload · Standard Excel/CSV trade file

Cashflow upload · Deposits, withdrawals, fees

Client upload · Bulk new clients

MProfit trade upload · Trades with company names from MProfit

Securities upload · CSV of securities master

Historical price upload · Prices, benchmarks, AMFI NAV sync

Corporate actions upload · Dividends, splits, bonuses (if module enabled)

Agreement template upload · New agreement templates

Templates · Download cashflow/client CSV templates

Typical upload flow: Choose file → preview → confirm → check flash message → verify on client detail or transactions list.

9.2 Trade data

Hub links: All transactions, cashflows, historical prices, corporate actions, holdings report.

Screen · Purpose

All transactions · Browse, edit, delete trades

Cashflows · Non-trade cash movements

Historical prices · View/edit price history

Holdings report · Cross-client holdings (permission required)

Record trade · Manual single-trade entry (card on hub)

9.3 Reference data

Screen · Purpose

Asset classes · Equity, debt, gold, etc.

Securities · Stocks, ETFs, funds; refresh prices

Corporate actions · Maintain action master

Historical prices · Browse by security

Upload prices · CSV and NAV sync

Allocation models · Asset and security model weights

Hot stocks and **models** may also be linked from admin or reference hubs depending on deployment.

9.4 Recommendations

Screen · Purpose

All recommendations · Unified recommendations list

Generate new recommendations · Wizard for client + amount + model

Monthly investments · Monthly cycle list (same as Dashboards entry)

All recommended trades · Line-level trades pending execution

9.5 Reviews

Screen · Purpose

Period analysis V2 · Main period review tool (enhanced review module)

Performance email · Generate performance email content

Portfolio modelling · Link to construction tools

Legacy “generate review” flows may live under review blueprints; unified recs are under **Recommendations**.

9.6 Portfolio modelling

Screen · Purpose

Portfolio construction · Build target allocation for a client

Position construction · Line-level position building

9.7 Assignments (managers)

Path: Maintenance → Assignments

Tabs for **clients** and **leads**: assign or reassign advisor ownership.

10. Dashboards

Menu: Dashboards

10.1 Monthly investments

Path: `/monthly-investments`

Central place for the **monthly investment cycle** per client.

Column / element · Meaning

Client · Who the cycle is for

Stage · FUNDS → RECOS → NOTIFY → EXEC → UPDATE → COMPLETED

Amount · Investment amount for the month

Target date · Expected completion

Actions · Open detail, advance stage, add notes

Click a row to open the **monthly investment detail** page with full history and **Next stage** actions.

Stage colours (typical):

Stage · Colour hint · Your job

FUNDS · Yellow · Confirm funds received; enter amount

RECOS · Blue · Generate or attach recommendations

NOTIFY · Purple · Client informed of proposal

EXEC · Orange · Trades executed

UPDATE · Teal · Portfolio/holdings updated

COMPLETED · Green · Month closed

At **RECOS**, the system often prompts for **recommendation amount** before advancing.

10.2 All workflows

Path: `/workflows` (list)

Shows workflows across modules: **lead**, **client_onboarding**, **portfolio**, **transaction**, etc.

Filter · Use
Module type · Narrow to leads vs portfolios
Status · Active, completed, cancelled, paused

Click a workflow to open **view workflow** with stage history and actions.

10.3 Reviews (schedules)

Path: Review schedules list (`clients.list_review_schedules`)

Set and monitor **when each client is due for a periodic review**. Tie-in with review workflow status on client detail.

11. Intelligence Hub

Menu: Hub (when `NAV_INTELLIGENCE_HUB_ENABLED`)

Dashboard · Focus
Operational intelligence · Ops tasks, issue queue, alert center, data integrity, recommendation execution monitor
Investment intelligence · Portfolio and investment monitoring agents
System intelligence · Jobs, Airflow, system health
Business intelligence · Practice-level metrics; may include Campaign Studio

Use these dashboards to **triage automated issues** from agents (data integrity, rec execution, performance). Each card usually links to a filtered issue or alert list.

Agents dashboard (if under Tools or linked from hub): trigger and inspect **data integrity** agent runs.

12. Attendance

12.1 All users

Screen · Purpose
My Attendance · View your attendance record
Incentive simulator · Model incentives (if enabled for your user)

12.2 Admins only

Screen · Purpose
Mark Attendance · Record attendance for a day

My Claims · Submit expense claims

Manage Attendance · Team attendance

Manage Claims · Approve or reject claims

Salary Calculation · Run salary from attendance rules (includes distributor revenue share when applicable)

Non-admin users see a single **Attendance** link without the admin submenu.

Distributors

Item · Detail

Role · Create a user with role **Distributor** and set **revenue share %** on Edit User

Assign · On client details (admin/manager): choose distributor (max one; client must have an advisor)

Portal · Distributor login → **My clients** (summary only) and **Payouts** (paid invoices × %)

Attribution · When an invoice is marked **paid**, payout accrues; cancelled/unpaid reverses it

Full design: `docs/DISTRIBUTOR_MODULE.md`.

13. Admin

Menu: Admin — admin users only

Access

Item · Purpose

Manage Users · Create, deactivate, reset users

User Access · Roles and permissions (`NAV_ROLES_ENABLED`)

Database (use with care)

Item · Purpose

Database browser · Browse tables (read-oriented)

SQL query · Ad-hoc SQL (restricted; audit usage)

System

Item · Purpose

Settings home · Central settings index (`/settings`)

Cron jobs · Scheduled job configuration view

System info · Version, environment info

Application logs · Log files and tail view

Holdings cycle · Holdings rebuild / cycle controls

Task assignment rules and other admin tools may live under Settings or separate admin routes when enabled — configure who gets ops tasks and review assignments.

14. Your account menu

Click **username** (top right):

Item	Action
Profile	Update name, email, password
2FA Security	Manage authenticator
Logout	End session securely

Always log out on shared computers.

15. Client detail page (deep dive)

Path: `/clients/<client_id>`

Open from: All Clients list, dashboard links, search on detail page (“Switch Client”)

Header actions

Button	Effect
Mark inactive / active	Soft-hide client from default lists
Next Client	Sequential navigation
Edit Client	Demographics, risk profile, advisor
Back to Clients	Return to list

Major sections (scroll on desktop)

Sections appear as **cards** down the page (not separate URLs):

Section	Contents
Client health	Score, status, active alerts, violations, recommendations
Billing & agreement	Active agreement, fee model, billing calculator, invoice history
Planning synopsis / background	Advisor notes (editable)
Portfolio summary	Value, XIRR, allocation charts
Nifty benchmark	Index level; expandable full simulation (slow — wait for load)
Holdings	Full holdings table; refresh from API
Performance	Top holdings, wealth creators, losers, sector breakdown
Cashflows	Timeline of money in/out
Transactions	Trade history; add/delete where permitted
Recommendations	Client-specific recs; generate modal
Review schedule	Next review date; set schedule modal
Meetings / tickets	Linked CRM items
Documents & call logs	Upload documents; log calls
WhatsApp / comms	Links as configured

Lazy sections: Imputed dividends and calendar-year XIRR load only when you expand them (can take 30–60 seconds).

Mobile: Use quick actions **Recs**, **Workflow**, **Review**; tap **All tabs** to jump to desktop sections.

Client-scoped shortcuts

Task · Where

Unified recommendations · Quick action or **Recs** → `/unified-recommendations/...` for client

Period analysis · Review quick action with `client_id`

Latest monthly investment · **Workflow** quick action when a cycle exists

16. Core business processes

16.1 New client onboarding

1. Create **lead** (optional) → follow up in Leads.
2. **Add client** with risk profile and contact details.
3. **Assignments** (manager): set advisor.
4. Upload **agreement** and documents on client detail.
5. **Cashflow / trade upload** for opening balances.
6. Create **monthly investment** → workflow starts at **FUNDS**.

16.2 Monthly investment cycle

Step · Who · System action

1 · Ops/advisor · Record funds; advance to RECOS

2 · Advisor · Generate recommendations; enter amount

3 · Advisor · Mark client notified (email/WhatsApp/meeting logged)

4 · Ops · Execute trades; update recommended trade status

5 · Ops · Refresh holdings / confirm portfolio

6 · Anyone · Complete; archive when month ends

Monitor progress on **Dashboards** → **Monthly investments** and **Daily workflow report** (if linked from maintenance or legacy tools).

See also: `docs/WORKFLOW_SYSTEM_GUIDE.md`.

16.3 Investment recommendations (unified)

1. **Maintenance** → **Recommendations** → **Generate**, or client detail → **Generate recommendations**.
2. Select client, amount, and model constraints.

3. Review proposed trades; adjust if policy allows.
4. Send to client (NOTIFY stage) and record approval.
5. **Execute** via recommended trades screen or transaction entry.
6. Confirm holdings updated.

16.4 Client review (periodic)

1. Check **review schedule** on client or **Dashboards** → **Reviews**.
2. Open **Period analysis V2** (Maintenance → Reviews).
3. Select client and period; run analysis.
4. Use **Performance email** for client-ready narrative where applicable.
5. Log **meeting** when review is discussed.
6. Update review workflow status: **initiated** → **sent** → **meeting** → **closed** (where review workflow is used).

16.5 Portfolio rebalancing

1. Review allocation drift on **client detail** or **portfolio construction**.
2. Generate recommendations (sell/buy lines).
3. Client approval → execute trades → verify allocation vs model.

16.6 Service ticket resolution

1. **New Service Ticket** from client context or menu.
2. Assign owner; set priority.
3. Work ticket; add notes.
4. Close ticket; dashboard counts update.

17. Alerts and SLA monitoring

Alerts flag **delays** in workflows and recommendations against configured SLAs.

Access

Entry · Path

Dashboard cards · Click alert counts

Alert list · `/alerts`

Alert dashboard · `/alerts/dashboard` (management view)

Hub · Operational → Alert center

Severity

Level · Typical meaning

Critical · SLA breached; immediate action

Warning · Approaching SLA deadline

Info · Informational

Actions on an alert

1. **Acknowledge** — you are working on it.
2. **Resolve** — add notes and close.
3. **Escalate / assign** — pass to manager or colleague (where available).
4. Fix underlying workflow stage, then resolve.

Default workflow SLAs (indicative)

Transition · Typical SLA

FUNDS → RECOS · 2 days

RECOS → NOTIFY · 3 days

NOTIFY → EXEC · 2 days

EXEC → UPDATE · 1 day

UPDATE → COMPLETED · 1 day

Exact thresholds are configured in `sla_configuration` and may differ per deployment.

See: `docs/ALERT_SYSTEM_README.md`.

18. Optional features

Your menu may omit items below if the module failed to load or is disabled in config.

Feature · Config flag · Menu location

Client analytics · `NAV_FINANCIAL_ANALYTICS_ENABLED` · Clients

Service tickets · `NAV_TICKETS_ENABLED` · Clients

Corporate actions · `NAV_CORPORATE_ACTIONS_ENABLED` · Maintenance / reference

Enhanced review tools · `NAV_ENHANCED_REVIEW_ENABLED` · Maintenance → Reviews

Invoices · `NAV_INVOICES_ENABLED` · Clients

Ops tasks · `NAV_TASKS_ENABLED` · Clients

Intelligence Hub · `NAV_INTELLIGENCE_HUB_ENABLED` · Hub

Agents dashboard · `NAV_AGENTS_DASHBOARD_ENABLED` · Hub / tools

Data integrity UI · `NAV_DATA_INTEGRITY_ENABLED` · Hub

Airflow UI · `NAV_AIRFLOW_ENABLED` · Hub / admin

PaRRVA · `NAV_PARRVA_ENABLED` · Clients

Financial planning · `NAV_FINANCIAL_PLANNING_ENABLED` · Clients

Roles admin · `NAV_ROLES_ENABLED` · Admin

Account management · `NAV_ACCOUNT_MANAGEMENT_ENABLED` · Tools / hub

Campaign Studio · `NAV_CAMPAIGN_STUDIO_ENABLED` · Business hub

If you expect a menu item and do not see it, ask your administrator whether the module is enabled in production.

19. Glossary

Term · Meaning

AUA · Assets under advice — total client portfolio value advised

XIRR · Extended internal rate of return — performance measure

Workflow · Tracked process with stages (e.g. monthly investment)

Unified recommendations · Single workflow for generating and executing model-based trades

Ops task · Internal to-do, often from alerts or integrity issues

Model · Asset or security allocation template

Rec / RECOS · Recommendation stage of monthly investment

SLA · Service level agreement — max time allowed in a stage

PaRRVA · Regulatory reporting integration (when enabled)

20. Troubleshooting

Problem · Try this

Cannot log in · Check email/password; complete 2FA; contact admin if locked

Page 403 Forbidden · You lack role or client assignment; ask manager

Menu item missing · Module not enabled — see Optional features

Upload failed · Check CSV format against template; read flash error; fix row errors and re-upload

Holdings look wrong · Confirm trades and cashflows; refresh holdings; check corporate actions

Alert action fails · Refresh page; re-login; ensure you have permission on that alert

Slow client detail · Avoid expanding heavy sections unless needed; use desktop for full analysis

Mobile layout broken · Force refresh; clear cache; use **More** menu for secondary routes

CSRF error on submit · Refresh, log out/in; do not use back button after long idle

Support path: Team lead → system administrator → technical support.

Logs (admin): Admin → Application logs.

21. Related documentation
